SPF SHRIMP FEEDS

FEATURES

SPF Shrimp Feeds offers a full portfolio of diets designed specifically for shrimp hatcheries, developed to deliver consistent performance and reliable results.

We offer microencapsulated feeds for zoea and mysis feeds and microparticulate for PL feeds.

The range consists of three specialized feeds—Zoea, Mysis, and PL—each uniquely formulated to meet the nutritional requirements of its respective developmental stage.

BENEFITS

- Suitable for use from the Zoea stage through to post-larvae (PL).
- Designed to meet the specific nutritional needs of each developmental stage.
- Uniform particle distribution to efficiently feed varying sizes from Zoea to PL.
- A comprehensive range of feed sizes available.
- Individual formulations tailored to each product.
- Produced using a proprietary sifting process.
